

Hospital: Minzu Hospital of Guangxi Autonomous Region

(2006-05-22-guangximinzuyiyuan.mp3) Time of the call: 2006-05-22

Phone: 01186...

Q: Investigator, A: Doctor Lu, Guoping

=====

Q: It was not them ...

A: Oh, Yes ...

Q: Doctor, now I trusted you so much, I trusted you so much, I would like to ask you, aren't they all using organs from Falun Gong practitioners now?

A: Not now. Now the control is relatively strict.

Q: Didn't you use Falun Gong practitioners' organs before?

A: Now it has changed from before.

Q: Hasn't your hospital used it before and got this kind of supply? I know for sure, because your Guangxi Minzu Hospital is relatively good in operation. So if you used it before, why no more now? Could you find organs from Falun Gong practitioners? If yes, I will come over. Could you give me a positive answer?

A: Let me tell you, we have no way to get it. It's rather difficult to get it now in Guangxi. If you cannot wait, I suggest you go to Guangzhou [Province] because it is very easy for them to get the organs. They are able to look for them nation-wide. As they are performing the liver transplant, they can get the kidney for you at the same time, so it's very easy for them to do. Many places where supplies are short go to them for help.

Q: Please tell me which place in Guangzhou [Province]. I will thank you for the help you gave me when time comes.

A: Okay.

Q: Ah,

A: Oh, okay, okay. I will tell you the phone number of the doctor over there when you are ready.

Q: Which hospital?

A: I will tell you a phone number. Please wait for half a minute. I will bring over the phone number.

Q: Thank you. I will Thank you afterwards.
[Waiting Time]

A: Hello,

Q: En

A: Hello, Hello,

Q: En, En,

A: First, you can jot down the number of this doctor, 13609038255.

Q: 3825

A: 38255

Q: Oh, 255. 13609038255

A: Correct, Correct, Correct. This is the No. 3 Hospital Affiliated to Zhongshan University.

Q: Is it in Guangzhou?

A: Ah, Correct, Correct, Correct.

Q: No. 3 Hospital Affiliated to Zhongshan University?

A: En.

Q: What's the name of the doctor? What's the name of the doctor?

A: Doctor Miao.

Q: Ah?

A: Last Name Miao.

Q: Miao then what?

A: Miao Bin.

Q: Which "Miao"? ...

A: [describing how to write the name of Miao Bin in Chinese]

Q: Is he from the liver transplant section?

A: No, he is from the kidney transplant section. Because the two sections share the same building, they are together.

Q: Why is it easy for them to get? Not you? Why?

A: Because they are important institutions. They contact with the judiciary system in the name of the whole university.

Q: Then they use organs from Falun Gong practitioners?

A: Correct, correct, correct.

Q: Correct, Correct, Correct?

A: You can also use a relative's kidney, or use a kidney from a cadaver body.

Q: He said that the organs from Falun Gong practitioners are relatively healthy and better. Do they use this kind as well?

A: Correct, correct, correct. Usually the healthy ones are chosen.

Q: What I mean is that the organs from Falun Gong practitioner are better. Do they use this kind as well?

A: Correct, correct, correct. For details, please call them directly. You can tell him that Doctor Lu from Minzu Hospital recommend you to him. He is my college classmate.

Q: Oh, you are his classmate. What's your full name, so I can mention to him?

A: Um, my last name is Lu.

Q: Is Lu the same as "Lu Xun"?

A: It's the same as the "Mount" Lu.

Q: Oh, Doctor Lu, your first name?

A: Guoping, Guo as in the country (Guo), and Ping as in Deng Xiaoping.

Q: Lu Guoping. Dr. Lu, Guoping.

A: You can call him and say that I recommend you to him, and he will take good care of you, because we were classmates before.

Q: Yes, yes. After it's done, I will thank you as well.

A: You go ahead and contact him directly.

Q: Sure. Did he help you before to look for this best kind of organ supply?

A: Correct, correct, correct. They operate many cases each week. Because they have done a lot, they have a good supply channel.

Q: Oh, good supply channel.

A: Because almost all hospitals in China can do this kind of operation, why don't they do it? It's because they are not able to get the supply.

Q: Oh, but they could. Where do they get it, from local or other area?

A: They have contact locations all over the country. They have a group specialized in looking for it.

Q: I see. Do they also look for organs from Falun Gong practitioners? That type is very healthy.

A: Correct, correct, correct.

Q: Doctor Lu, do you have a cell phone number? If you tell me, I will introduce patients to you in the future.

A: En, Please do. 13607710447.

Q:0447 .

A: Correct.

Q: 13607710447.

A: You look for him. They have many friends of mine there.

Q: Oh, over there, they are all your friends. You know, my patient, is someone dear to me, is my child, my daughter, so I care for her very much, and hope to look for a healthy one. Does your hospital use organs from Falun Gong practitioners? Didn't you use it before, in 2001, all these years ...

A: We do use. But it's hard to get it now...

Q: Was it very easy in the past?

A: You could only get this kind through some familiar channels. Otherwise, you will pay extra for the bribe. Because they get it for wholesale price, don't you understand?

Q: Wholesale price? For example what you used before, were they from detention center or prison?

A: From prisons.

Q: Oh, prisons. And it was from healthy Falun Gong practitioners, the healthy Falun Gong right?

A: Correct, correct, correct. We would choose the good ones, because we will assure the quality of our operations.

Q: That means you choose the organs yourselves?

A: Correct, correct, correct.

Q: Have you done a lot in your hospital?

A: Because we could not get the supplies, we hardly did any these few years. But they have done a lot over there. They have a room full of patients waiting for transplants. Since they did a lot, they are very skillful, you know, so their operation quality is generally good.

Q: Oh, their quality is good...

A: Because we do relatively fewer [operations], though we could also do, but after all this year we do fewer [operations] ...

Q: Wasn't that in 2001, it was easy to find Falun Gong organ suppliers?

A: But now it is such a situation, you just have to look for them.

Q: So it means that they are easy to find the supply. Once over there and mention your name, they will find me one, right?

A: Yes, Yes, Yes, Yes.

Q: Do you think he will help me find one from Falun Gong practitioner?

A: You shall have no problem with it there.

Q: Can find it?

A: I can tell you that it is very easy to get the organs there.

Q: Oh, very easy?

A: Because they will do 7-8 liver transplants per week, and he will do more than ten kidney transplants. Each month, they will do dozens cases, so they never worry about the organ supplies.

Q: Then did your classmate tell you if their operations all used organs from Falun Gong practitioners?

A: Some of them, the others came from family donors.

Q: Oh, that means if I want to find, for my kid, organs from Falun Gong practitioner, do you think he can help me find one?

A: That is for sure.

Q: Really? I heard your hospital used to do operations using organs from practitioners. Have you done a lot?

A: We did before, but not that much. Didn't I tell you that not every hospital can get the supply? Because it depends on how close you are to the public security bureau system. And now, this kind of organ is very scarce. That is why some hospital can get it, but some other hospital cannot. That is the reason.

Q: You mean one should contact court, not directly forced labor camp and detention center?

A: You are right. This cannot be controlled by our hospital.

Q: You mean one needs to bribe them for it, right?

A: Yes. One needs to send in money for it, do you think it's easy?

Q: Then do you usually use organs from male or female practitioners?

A: Both kinds are used. He will match your tissue first.

Q: I know. Usually how old is the age of the organ supplier?

A: Usually in their 30s.

Q: In their 30s. Then you will go to the prison to select yourself?

A: Correct, correct, correct. We must select it.

Q: What if the chosen one doesn't want to have the blood drawn?

A: He will for sure let us do it?

Q: How?

A: They for sure will find a way, what do you worry about? Those kinds of things should not be of any concern to you. They have their procedures.

Q: Doesn't the person know that his organ will be removed? Does he know about it?

A: No, he doesn't.

Q: So he knows nothing about it? So you don't tell him, if he knows, he will object to it, right?

A: Correct, correct, correct.

Q: Then how to persuade him? He will question why would you draw his blood, how are you going to respond?

A: They have enough methods. This is not the thing you should worry. What you should do is to pay all the fees when coming to the hospital. So you don't need to worry about anything else.

Q: I am afraid they could not find organs from Falun Gong practitioners. I worry about it.

A: Then I will tell you that if they could not find one, nobody will.

Q: You mean they are sure to find organ from Falun Gong practitioner?

A: Correct, correct. If they could not find one, I will not recommend you to go over there.

Q: Oh, it is like this. That is to say, now I only need to prepare enough money, and go look for him. I will mention that you recommended him.

A: That is alright. Now I have to go and perform an operation.

Q: Then if I have issues, I will call you any time.

A: Okay.

Q: Thank you. I would like to thank you for your help. Bye-bye.
